# LET'S START!

Every day, all over the world, baby animals are born. Some are small, some are big. They are all amazing! Welcome to the world, babies!

Look at these baby animals. What animals are they? Do they look like their mothers or like their fathers? Do they drink milk to grow?

Now, learn all about some more babies!

# 1

## GETTING READY

It's time to have babies!  
Different animals do  
different things.

Polar bears make a den  
in the ice. It's nice and  
warm in there!

Spiders make a sac for  
their babies. They put  
the sac on their web.  
Then, they go away.  
Mother spiders don't  
see their babies again.

**Birds**  
make a nest,  
ready to  
lay their eggs.  
The male and  
female birds  
both look after  
the eggs.

**Hippos**  
go to the  
river  
when it is  
time to have a  
baby. The baby is  
born underwater.  
It can swim  
straight away!

**FAST  
FACT**

The cuckoo lays  
its eggs in another  
bird's nest.
